

SUBJECT INDEX

A

- Acne vulgaris, effect of antibiotics on enteric bacteria in, 183
- Allergic contact sensitization, mechanism of, 339, transfer of, 291
- Alpha rays, erythema effects of, 199
- Aminostilbamidine, in coccidioidomycosis, 69
- Amphotericin B, effect of on coccidioides immitis and candida albicans, 217
- Amyloidosis, and urticaria pigmentosa, 243
- Androgens, subcutaneous implantation of, 155
- Annual Essay Contest of ADA, 192
- Antibiotics, effect of on enteric bacteria in acne vulgaris, 183
- Antifungal agents, procedure for testing, 359

B

- Bacteria, enteric, effect of antibiotics on in acne vulgaris, 183
- Banithine, galvanic skin response and, 239
- Basement membrane, development of, 195
- Blastomyces dermatitides, aminostilbamidine in, 70
- Blister fluid, passive transfer with, 296
- Buried skin, changes in, 377

C

- Candida albicans, aminostilbamidine and, 70 effect of amphotericin B on, 217 precipitin test to, 349
- Candida stellatoidea, precipitin test to, 349
- Capillary microscopy of skin, 283
- Cardiolipin, as antigen, 305
- Cerumen, lipid and protein in, 63
- Chlorpromazine, photosensitivity due to, 329
- Clearing factor, and intravenous fat emulsions, 317
- Clotting time, and intravenous fat emulsions, 317
- Coagulation time, effect of phosphatides on, 321
- Coccidioides immitis, effect of amphotericin B on, 217

- Coccidioidomycosis, aminostilbamidine in, 69
- Collagenous tissue, effect of on dermatophytes, 47
- Connective tissue, mucopolysaccharides and, 419
- Contact-type sensitization, experimental, with paraphenylenediamine, 121 mercury²⁰³ and, 339 transfer of, 291
- Copper-combining compounds, effect on dopa reaction, 1
- Cornified epithelium, water-binding, 5
- Cortisone-4-C¹⁴, absorption of through skin, 211
- Cryptococcosis, with cutaneous manifestations, 159
- Cryptococcus neoformans, aminostilbamidine and, 70
- Cycloheximide-chloramphenicol, in culture medium, 367

D

- Dermatitis, eczematous, saprophytic fungi and, 137
- Dermatomyces, triglyceride therapy and, 363
- Dermatophyte, effect of gelatin and collagenous tissue on, 47 invasion of nails by, 261
- Desquamating machine, 275
- Dog, microsporum audouinii in, 313 microsporum distortum in, 449
- Dopa reaction, effects of chemicals on, 1

E

- Eccrine sweat gland, injury and, 105
- Eczematous dermatitis, saprophytic fungi and, 137
- Electron microscopy, of keratohyalin, 325
- Electrophoretic pattern, and intravenous fat emulsions, 317
- Emulsifying agents, and electrophoretic patterns, 317
- Eosinophile count, local meticortelone and, 385
- Epidermis, melanocytes of, 33
- Erythema, due to polonium plaque, 199
- Estrogens, subcutaneous implantations of, 155

F

- Fat emulsions, intravenous injection of, 317
Fibrinolysin, effect of on itching and inflammation, 429
Fungi, cycloheximide-chloramphenicol in culture of, 367
saprophytic, and eczematous dermatitis, 137
Fungicides, procedure for testing, 359
Fungistat, aminostilbamidine, 69
amphotericin B, 217
ortho tack wash, 233
Fungous cultures, control of mites in, 373

G

- Galvanic skin response, 239
Gelatin, effect of on dermatophytes, 47
Gloves, impermeable, effect of on sweat oppression, 443
Gonads, quantity of radiation to from x-ray therapy, 187
Guinea pig, microsporium audouinii in, 311

H

- Hair, tyrosinase and, 273
Horny layers, water-binding of, 5
Hydration, sweating and, 435
Hydrocortisone, local, comparison of soluble forms of, 455
Hydrocortisone-4-C¹⁴, absorption of through skin, 214
Hydroxyphenyl compounds, effects of on dopa reaction, 1

I

- Inflammation, prednisolone and, 269
proteolytic activity and, 427
Itching, proteolytic activity and, 427

K

- Keratin, and keratohyalin, 325
Keratohyalin, electromicroscopy of, 325
Kveim reaction, specificity of, 55

L

- Lecithin, as antigen, 305
Lindane, control of mites with 373
Lipid, in cerumen, 63
Lymphocytes, passive transfer with, 295

M

- Melanocytes, in epidermis, qualitative and quantitative data on, 33

- tyrosinase activity in, 273
in tissue culture, 15

- Mercury²⁰³, sensitization to, 339
Metal salts, effect of on dopa reaction, 1
Methacholine, and sweat, 447
Meticortelone, local, and eosinophile count, 385
Microsporium audouinii, in dog, 313
in guinea pig, 311
Microsporium distortum, in animals, 449
Mites, control of in fungous cultures, 373
Monkey, microsporium distortum in, 449
Mucoid alteration, in degenerative and congenital dermatoses, 403
Mucoid collagen fibers in granulations, tumors, 387
Mucopolysaccharides, in inflammation, 419

N

- Naphthalenes, effect of on pilosebaceous apparatus, 89
Nocardia asteroides, aminostilbamidine and, 70

O

- Ortho tack wash, in guinea pig ringworm, 233

P

- Paraioodoaniline, experimental sensitization to, 128
Paraphenylenediamine, experimental sensitization to, 121
Passive transfer, of contact sensitization, 291
Photosensitivity, chlorpromazine and, 329
Pigment cells, of epidermis, 33
Pilosebaceous apparatus, substituted naphthalenes and, 89
Polonium plaque, erythema due to, 199
Polymorphous light eruption, UV test sites in, 147
Precipitin test for candida, 349
Prednisolone, in inflammation, 269
Probanthine, galvanic skin response and, 239
Protein, in cerumen, 63
Proteolytic activity, in inflammation and itching, 425
Pruritus, proteolytic activity and, 427

Q

- Quinonechloroimide, experimental sensitization to, 130

R

- Radiation, alpha, erythema due to, 199
gonadal quantities of in x-ray therapy, 187
ionizing, responsibilities of medical profession—Jan. issue, i
Reiter protein complement-fixation (RPCF) text, 459
Ringworm, in guinea pigs, therapy of, 233

S

- Sarcoid, Kveim reaction and, 58
Sebaceous apparatus, substituted naphthalenes and, 89
Secretory coil of sweat gland, injury and, 105
Sensitization, contact-type, mechanism of, 339
transfer of, 291
experimental with paraphenylenediamine, 121
to chlorpromazine, 329
Skin, buried, changes in, 377
Skin desquamating machine, 275
Streptokinase, effect of on inflammation and itching, 429
Stripping, skin, machine for, 275
Sulphates, in human sweat, 271
Sweat, and skin hydration, 435
impermeable gloves and, 443
methacholine and, 447
sulphates in, 271

T

- Tissue culture, of melanocytes, 15
Triacetin, in dermatomycoses, 363
Trichophyton mentagrophytes, antifungal remedies and, 359
in guinea pigs, therapy of, 233
invasion of nails by, 261
Trichophyton rubrum, invasion of nails by, 261
Trichophyton tonsurans, invasion of nails by, 261
Triglyceride therapy, in dermatomycoses, 363
Trypsin, effect of on inflammation and itching, 427
Tyrosinase, in melanocyte proliferation, 273

U

- Ultra-violet tests in polymorphous light eruption, 147
Urea, effect of on dopa reaction, 1
Urticaria pigmentosa, and amyloidosis, 243

W

- Water-binding of horny layers, 5

X

- X-ray, responsibilities of medical profession and—Jan. issue, i
X-ray therapy, amount of radiation reaching gonads in, 187
